- d. **Program for 2007 AALL**
 - i. Several people had ideas for a program for the 2007 conference in New Orleans.
 1. **OCLC Collection Analysis** (Connie)—Many libraries are just starting to experiment with it. Possible ideas include having an OCLC rep give a demonstration and invite speakers from libraries currently using it to share their experiences.
 2. **Collecting non-law materials** (Doug)—this program would explore how we, as collection development

librarians, are supporting the increasing need for law students to do non-legal (e.g., business, etc.) research

3. **Publisher panel** (Edward)—this panel would involve a group of selectors from publishers and describe what they are looking for.
4. **Traveling Collections** (Courtney)—this program could serve as an introduction to traveling collections, with a description of what they are, how to acquire them, etc.
