Faculty Services Committee plans on holding several listservs on various topics during the upcoming year. They will choose 2 or 3 from the following list:

1. The role of librarian as researcher – and the difference between research assistants and librarians
2. How to support empirical legal research
3. How to help faculty deal with information overload
4. The types of proactive services provided to faculty
5. Blurring the lines of traditional library service – what services are you offering that would not be considered traditional library services, including services like developing web pages / wikis for faculty; posting working papers
6. Surveying faculty: finding out how libraries have effectively surveyed faculty and sharing surveys

The committee will also be forming a group to look at the website.

Newsletter is on schedule.

On a related note, Diane Murley let us know that she hasn't gotten minutes since 2/2008. Filippa will contact Linda Ryan, the previous Secretary to get us caught up. Sara will send our recent minutes, as approved.

A general discussion of the committee structure and soliciting members of committee ensued.
