

# MON. 7/14 5:30PM — CS-SIS HOT TOPIC II: USING LAMP TO SHINE A LIGHT ON OPEN SOURCE APPLICATIONS IN A LIBRARY SETTING

---

## 2008 AALL ANNUAL MEETING AND CONFERENCE

Date/Time: Mon, Jul 14 5:30pm - 6:30pm

Location/Room: OCC-F152

Any library can benefit from integrating open source applications into its technological infrastructure. While many servers already run a variation of LAMP (Linux Apache MySQL PHP), other open source programs could be beneficial to a library setting. Programs such as a student worker timeclock, a content management system, a room booking platform and a survey tool will be set up, configured and demonstrated. Furthermore, this program will highlight the important points of the GPL license, which many open source applications utilize.

Speaker(s):

Stacey Rowland - University of Mississippi Law Library

Dan Blackaby - Western State University College of Law Library
