

TUES. 7/26 3:15PM — K3: MOBILE APPLICATIONS: FILTERING THROUGH THE JUNK

2011 AALL ANNUAL MEETING AND CONFERENCE

Date/Time: Tue, Jul 26 3:15pm - 4:15pm

Location/Room: PCC-Room 201(C)

Between the Apple iPhone and various Android devices, more than 300,000 applications are available to society for use in the workplace and home environments. Finding good apps is hard. Understanding which activities can be accomplished using mobile devices can be equally difficult. This program will highlight best-of-breed mobile applications by focusing on tools that solve problems for law librarians. Presenters will demonstrate various features of mobile applications for the iPhone, Android, and Blackberry devices, including some tools for iPad and other tablets. In addition, available resources to discover and evaluate new applications will be shared.
