Member-at-Large Report 07/07/2023

This year we worked on getting the LSRD-SIS Areas of Interest resource up and running and integrated into the LSRD-SIS website. We received several submissions for the resource and we hope that it will grow into a more robust source for people to share their interests, connect learners, and grow our network and professional development opportunities.

The resource itself was originated as a Lib Guide, although in April/May 2023 it was moved to the LSRD-SIS website where it is currently hosted as a webpage. This ultimately makes it easier for future board members to manage since it isn’t locally hosted on one institution’s Lib Guide instance.

I worked with Chris Siwa to format the page in a way that better displays the content and makes it more navigable for users by included a hyperlinked table of contents at the top of the page.

I am looking forward to continuing to build this resource during my last year as Member-at-Large for the LSRD-SIS board, and finding new ways to engage with our membership and continue to work with the board to make LSRD-SIS an active and rewarding SIS for all members.

Sincerely,

Keelan Weber
