Developer Network
Platform
• Collection management and record management functionality with platform Web services coming over the next three years

• Complete metadata management for physical, licensed, and digital resources across multiple formats

• Integrated with other WMS components such as WorldShare Acquisitions and WorldShare Circulation; also works with traditional integrated library systems (ILS)

• Initial collection management functionality in pilot; coming later in 2012
Connexion client 2.40

- Released March 2012; must upgrade by October 1, 2012
- Enhancements
  - RDA workforms
  - RDA Toolkit IP authentication
  - Classify Web service
  - Ready for GLIMIR
  - New macro commands and macros

RDA Implementation & OCLC

- Connexion Client Changes
- MARC Update including new fields & subfields
- Policy Issues
- Training
• Option to use your IP Authentication to enable login for RDA Toolkit field descriptions

• Select the option under Tools/Options/RDA (Screen-shot on next slide)
RDA Toolkit link and RDA Workforms

Options

- Use RDA workflows when creating new bibliographic records
- Use RDA workflows when creating new authority records
- Enable the RDA Toolkit
  - Use IP authentication

Enter your RDA Toolkit username:

Enter your RDA Toolkit password:
MARC Format Changes

MARC 21 Format Updates, no. 13-14 and various code list changes

- Installed May 13, 2012
- Full details in OCLC Technical Bulletin 261

Highlights:

- Field 264
- 3XX fields in Bibliographic and Authority records
Entity Attribute (en:) Index

Bibliographic records
  • 046
  • 340, 344, 345, 346, 347
  • 377
  • 380, 381, 382

Authority records
  • 046
  • 368
  • 370, 371, 372, 373, 374, 376, 377, 378
  • 380, 381, 382, 383, 384
Field 264 elements included in:

- Publisher location index (pl:)
- Publisher index (pb:)
- Keyword index (kw:)
- Search results
And Other RDA Changes

Ongoing Record matching changes for RDA elements

Additional validation rules to insure correct coding

Yet to come:

• MARC format changes from this summer’s MARBI meetings
• More macros
• More validation rules to insure correct coding
Current OCLC policy statement is still in place:

Discussion paper (Incorporating RDA practices into WorldCat):

This paper was posted for about a 2 month comment period which ended April 15. 40+ comments were received and have been compiled. We are analyzing them.

Result: A policy statement that will replace the one above, issued sometime later this year.
RDA Policy Issues

• **NO ONE WILL BE REQUIRED TO DO ORIGINAL CATALOGING ACCORDING TO RDA**

• OCLC proposes allowing anyone to change records created under previous codes to RDA beginning after March 31, 2013.

• All headings, when controlled, will be in accord with authority file (so will be RDA when that change happens)

• Scope: Records with cataloging language of English (040 $b eng)
RDA Policy Issues: Changes to Existing records

- Allow addition of Content/Media/Carrier type (336/337/338 fields) to any bibliographic records
- Allow additional access points
- Spell out abbreviations in non-transcribed fields (e.g. spell out “p.” to “pages” & “ill.” to “illustrations” in 300)
- Change Latin abbreviations to RDA spelled out English equivalents (e.g. “[publisher not identified]” instead of “[s.n.]”, “approximately” instead of “ca.”)
RDA Policy Issues: Controversy?

- Overwhelmingly positive and thoughtful comments
- Most controversial: proposal to delete GMD from 245 when adding 336/337/338 fields to AACR2 records
- We do want to do this in WorldCat, but will delay this for a yet to be determined period of time --- mainly a display issue for local systems
• Look for a Free Webinar from OCLC regarding policy issues after the final OCLC RDA policy paper is released later in 2012

• OCLC is relying on training partners (Amigos, MCLS, Minitex, etc.) to provide “how to” RDA training. Training offered by training partners is listed in the training portal on the OCLC web site:

http://training.oclc.org/1

• Others offering training: ALCTS, LC, RDA toolkit training by ALA publishing, regional groups
• Now an OCLC production service available at:
  
  http://viaf.org/

• 22 agencies from 19 countries have contributed data
Specifically, VIAF:

- Links national and regional-level authority records, creating a cluster record for each unique name
- Expands the concept of universal bibliographic control by (1) allowing national and regional variations in authorized form to coexist; and (2) supporting needs for variations in preferred language, script and spelling
- Plays a role in the emerging Semantic Web

In December 2011, OCLC started implementing a project to apply a “Control All Headings” type functionality to WorldCat bibliographic records.

This process is applied in two separate simultaneous workflows to:

1. The entire WorldCat database of existing master bibliographic records as capacity allows, starting slowly and ramping up

2. Both newly added and changed/replaced master bibliographic records on a daily schedule, including records added/replaced online and via batchload. This is referred to as Daily Journal processing.

The symbol OCLCO is added to 040 field in ±d to identify records that have headings controlled or modified by this process.
Standalone heading control software

For more information see:

The project is being done in response to member priorities:

“In the research that led to the publication of Online Catalogs: What End Users and Librarians Want library staff who use WorldCat ranked the need for increased accuracy in name and subject headings as a highly desired improvement.
OCLC has added linked data to WorldCat by appending Schema.org descriptive mark-up to WorldCat.org pages.

Library-specific extensions defined in cooperation with Schema.org partners (Google, Bing, Yahoo!, and Yandex)

A further step in exposing library data to the broader Web

A first step in adding linked data to WorldCat

A step toward RDA implementation scenario #1

The end of lawyers?: rethinking the nature of legal services

Author: Richard E Susskind
Edition format: Book : English
Summary: This book examines the effect of advances in IT upon legal practice, analysing anticipated developments in the next decade. It explores the extent to which the role of the traditional lawyer can be

Rating: ★★★★★ based on 1 rating(s) 1 with a review
