## Comments

### Cornell University

- 1.) We do not differentiate between vendor & outsourced records.
- 2.) We do not keep statistics on electronic cataloging backlog.
- 3.) Shared cataloging figures include titles added to existing Cornell University Library records.
- 4.) All authority records are NACO.

Jean M. Pajerek

### George Washington University

The Cataloging dept. is current is its cataloging of recently published materials. The backlog consists of storage or rare materials for which brief records are available in the local catalog. Cataloging was able to clear 1405 titles this year from this growing collection.

Virginia Bryant

### Stanford University

If no entry, then we do not keep track of statistics, for example LC versus other types of records. We also do not count any recataloged records.

- The total number of nonprint monographic titles includes some serials. These are outsourced records that are added to the catalog by the main library. I receive only the total number of records.
- We don't really have a "backlog"—just a shelf of foreign language titles waiting for copy.

Ryan Tamares

### University of Iowa

We implemented Alma on July 1<sup>st</sup>, 2016.

Karen L. Knobbs

### University of Michigan

\*Our cataloging statistics include in-house and outsourced (Backstage Library Works) bibs only. They do not include vendor bibs (e.g. Serials Solutions)

\*\*A title in multiple formats is counted as a separate title for each format, even if piggy-backed onto one bibliographic record; hence the apparent discrepancy in numbers [for total number of titles cataloged versus separate categories]

Bethany Huseman

## **University of Pennsylvania**

- Total number of titles cataloged includes vendor records sourced from: Bloomberg (182), BNA (14), Marcive (2512), LLMC digital (871), Cassidy (3244, including HeinOnline, Kluwer arbitration and Lexis e-treatises records), and Serials Solutions (92). Outsourced print monographic records are shelf-ready materials from OCLC's WorldCat Cataloging Partners and Backstage Library Works.
- We make no distinction between recon and recat.
- We do not report source of copy used for recataloging, and do not report the source of call number for reclassified titles.
- The Metadata Services Librarian will retire on June 30, 2017. Her job will be combined with the vacant Systems Librarian position. Interviews for the Metadata/Systems Librarian position are proceeding.

Judy Vaughan-Sterling

## **University of Texas**

- Our cataloging statistics are based on cataloging records processed and may include records that were overlaid during the relevant period by updated records.
- We did not include vendor records that were loaded and subsequently suppressed, which accounts for some of the differences in our numbers this year.
- Catalog records for print books and books that we have in both print and electronic format are included in the monographic titles category.
- Catalog records for titles in e-book format only are included in the non-print monographic titles category.
- Catalog records for print serials and serials that we have in both print and electronic format are included in the continuing resources titles category.
- Catalog records for electronic-only serials and websites are included in the non-print continuing resources titles category.
- Our vendor records are sourced from BNA, CALI, Cassidy, PLI, LLMC, and Marcive.

Mary (Molly) Brownfield

## **Yale University**

Does not include ebook or serial records from vendors, e.g. UPSO, Cassidy, Serials Solutions, Elgar.

Scott Matheson
