Comments

Cornell University

- 1.) We do not differentiate between vendor and outsourced records.
- 2.) We do not keep statistics on electronic cataloging backlog.
- 3.) Shared cataloging figures include titles added to existing Cornell University Library records.
- 4.) All authority records are NACO.

Jean Pajerek

George Washington University

The Cataloging dept. is current in its cataloging of recently published materials. The backlog consists of storage or rare materials for which brief records are available in the local catalog. Cataloging cleared 1958 titles this year from this collection.

Virginia Bryant

Indiana University

We do not keep separate statistics breaking down between serials and monographs.

Michael Maben

Stanford University

- If no entry, then we do not keep track of statistics, for example LC versus other types of records. We also do not count any recataloged records.
- The total number of nonprint monographic titles includes some serials. These are outsourced records that are added to the catalog by the main library. I receive only the total number of records.
- We don't really have a "backlog"—just a partial shelf of foreign language titles waiting for copy.

Ryan Tamares

University of Iowa

Cataloging backlog is measured by number of titles, not linear feet = 1004 titles.

Karen Nobbs

University of Michigan

Our cataloging statistics include in-house and outsourced (Backstage Library Works) bibs only. They do not include vendor bibs (e.g. Serials Solutions). A title in multiple formats is counted as a separate title for each format, even if piggy-backed onto one bibliographic record; hence the apparent discrepancy in numbers.

Bethany Huseman

University of Pennsylvania

There is a discrepancy between the number of microfilm previously recorded. For the past few years, the number was incorrectly reported. The number this year reflects the corrected number in the library's collection.

Jeffrey Grillo

University of Texas

- Our cataloging statistics are based on cataloging records processed and may include records that were overlaid during the relevant period by updated records.
- We did not include vendor records that were loaded and subsequently suppressed.
- Catalog records for print books and books that we have in both print and electronic format are included in the monographic titles category.
- Catalog records for titles in e-book format only are included in the non-print monographic titles category.
- Catalog records for print serials and serials that we have in both print and electronic format are included in the continuing resources titles category.
- Catalog records for electronic-only serials and websites are included in the non-print continuing resources titles category.
- Our vendor records are sourced from BNA, CALI, Cassidy, PLI, LLMC, and Marcive.

Mary (Molly) Brownfield

Yale University

Separate non-print mono/continuing resources figures not kept.

Our stats do not include ebook or serial records from vendors such as UPSO, Cassidy, Serials Solutions, Elgar.
